Company Presentation

Samsung is a South Korean multinational company, which expanded over time into **different business areas**, like food processing, textiles, insurance, securities, and retail.

In the late 1960s, it entered the electronics industry, followed by construction and shipbuilding in the 1970s, sectors that later drove its growth. Samsung has increasingly globalized, and the main segments became **communication, consumer electronics, semiconductors** and **display panels**. In 2023, Samsung held a **7.5% share in the global semiconductor market**, ranking among the top two in sales revenue, and a **20% smartphone market share**, selling nearly 230 million phones. The **Samsung Galaxy line** and **Samsung Pay** are key to its mobile success.

Mission, Vision and Core Values

Samsung's mission is to create **top-quality products and services** that enhance global society. Its vision is to inspire the world with **innovation**, enriching lives and supporting social progress.

MISSION STATEMENT

WE WILL DEVOTE OUR HUMAN RESOURCES AND TECHNOLOGY TO
CREATE SUPERIOR PRODUCTS AND SERVICES, THEREBY CONTRIBUTING
TO A BETTER GLOBAL SOCIETY.

VISION STATEMENT

TO INSPIRE THE WORLD WITH OUR INNOVATIVE TECHNOLOGIES,
PRODUCTS AND DESIGN THAT ENRICH PEOPLE'S LIVES AND CONTRIBUTE
TO SOCIAL PROSPERITY BY CREATING A NEW FUTURE.

SWOT Analysis

The SWOT analysis acts as a **strategic tool** for identifying key **internal and external factors** that influence an organization's performance and decision-making. Through the analysis, we were able to uncover a potential area for growth and a significant opportunity to leverage the company's **strong brand reputation and customer loyalty**, paving the way for a campaign focused on **enhancing customer experience and product innovation**.

S

Strengths

- **Strong Brand and Market Position:**

Samsung is one of the world's most recognized electronics brands and is highly competitive across multiple categories.

- **Innovation and Technology Leadership:**

Known for cutting-edge technology, Samsung invests heavily in R&D, which has led to innovations.

- **Diverse Product Portfolio:**

Samsung's broad range of products creates revenue stability and growth across various segments.

- **Global Presence:**

Samsung has a massive global presence with manufacturing, sales, and service centers in numerous countries.

W

Weaknesses

- **Complex Product Ecosystem:**

Managing such a broad product range can be challenging, resulting in potential inefficiencies and resource allocation issues.

- **High Competition in Key Segments:**

Samsung faces fierce competition from other brands, such as Apple in the smartphone market and Xiaomi in budget electronics, which can squeeze its margins.

- **Brand Perception in Low-Cost Segments:**

While known for high-quality products, Samsung's premium branding can sometimes be a disadvantage in markets where cost is a key consideration, affecting its competitiveness in the lower-end segments.

O

Opportunities

- **Expansion in Emerging Markets:**

The demand for electronics is growing in developing regions. By tailoring products to these markets, Samsung could strengthen its presence and capture market share.

- **Semiconductor and Chip Manufacturing:**

With increasing demand for chips and semiconductors, Samsung has a valuable opportunity to expand its semiconductor business, benefiting from trends in AI, autonomous driving, and cloud computing.

- **Healthcare and Wearable Technology:**

As interest in health monitoring grows, Samsung has the potential to expand its wearable technology segment.

T

Threats

- **Trade Restrictions and Geopolitical Issues:**

Given the U.S.-China trade tensions and other regional issues, Samsung's operations can be impacted by trade restrictions, tariffs, and political pressures.

- **Technological Obsolescence:**

The tech industry moves quickly, and innovations from competitors or shifts in consumer preferences could lead to reduced demand for Samsung's existing products.

- **Economic Fluctuations:**

Economic downturns, especially in regions where Samsung has a strong presence, can impact consumer spending and demand for high-end electronic products.

Product Presentation

The Samsung Galaxy Ring is a sleek and innovative smart ring sedigned to elevate your **health** and **lifestyle**.

Equipped with **advanced sensors**, it tracks your fitness, sleep, heart rate, and overall well-being with precision.

Its **stylish lightweight design** seamlessly integrates technology into your daily routine, offering **effortless health monitoring and connectivity**. Perfect for those who value both **functionality** and **elegance**.

This new product is thought for users that are interested in tracking their stats but want to remain **comfortable on daily basis**.

The ring allows users to live their lives without being buderdened by another large volume device. The 7-day battery life is engineered to allow users to go through their week without the need to recharge

Galaxy AI ✨ is here

PESTEL Analysis

The PESTEL analysis serves as a **strategic guide** for selecting a marketing campaign theme, uncovering the complex external forces that shape **consumer trends** and **market dynamics**. Through this **comprehensive evaluation**, we identified an opportunity to focus the campaign around a **health-centric concept**.

Political

- **Trade Policies:**
Changes in trade tariffs or import/export regulations and political tensions with regions that are part of Samsung's supply chain might affect its ability to manufacture and distribute the Galaxy Ring.
- **Health Regulations and Data Privacy:**
Samsung must ensure compliance with strict worldwide regulations regarding health data and privacy (such as HIPAA in the U.S. and GDPR in Europe).

Economic

- **Economic Recovery and Consumer Purchasing Power:**
Although the tech sector has seen a resurgence post-pandemic, with high inflation and fluctuating global economies, consumer spending on non-essential luxury gadgets might decrease.
- **Production Costs:**
Rising costs of materials and components due to supply chain disruptions could impact the cost structure of Galaxy Ring, influencing its final price and Samsung's profitability on this product line.

Social

- **Tech Wearable Adoption:**
Wearables are becoming increasingly accepted in society, especially among younger generations.
- **Health and Wellness Trends:**
The growing emphasis on health and wellness, driving consumer interest in health-monitoring wearables, might make Galaxy Ring appealing to health-conscious consumers.
- **Aging Population:**
Increased demand for devices that monitor health metrics like heart rate, sleep, and blood oxygen levels as the population ages.

Technological

- **Innovation in Sensor Technology:**
Samsung's implementing advanced sensors, which improve the accuracy and reliability of the device, making it more appealing.
- **Compatibility with IoT and Ecosystem:**
Samsung's Galaxy ecosystem, including smartphones, tablets, and smart home devices ensures seamless integration between gadgets, enhancing user experience.
- **Data Security and AI:**
Security measures to comply with, as the product deals with sensitive health data and uses AI. Advances in AI enhance interpretation of collected data, providing more personalized health insights.

Ecological

- **Sustainable Manufacturing and E-waste management:**
Consumers and regulators increasingly expect companies to use sustainable materials and production methods, and its approach to e-waste at the product's end of life stage, including recycling programs or trade-ins, could appeal to eco-conscious consumers.
- **Energy Consumption:**
Minimizing energy consumption during production and operation (battery efficiency). Galaxy Ring's long battery life between charges (7 days) contributes to sustainability and also improves the product's appeal.

Legal

- **Product Liability and Health Claims:**
As a health-focused device, the Galaxy Ring must avoid making unverified health claims, as this could result in lawsuits or regulatory scrutiny.
- **Intellectual Property:**
Samsung must ensure that the Galaxy Ring doesn't infringe on patents held by other wearable and health-tech companies.

Market Trends and Statistics

Here, we have included **some recent data** to provide a **quantitative description** of Samsung's international impact. Having a **clear perception** of the brand is essential for defining the campaign effectively.

Global Market: The global wearable technology market was valued at approximately USD 61.30 billion in 2022 and is projected to expand at a compound annual growth rate (CAGR) of **14.6% from 2023 to 2030**. While exact figures for the global smart ring market are limited, estimates suggest a total revenue of \$300 million in 2023.

U.S. Market: In the United States, the wearable technology market was valued at USD 19.92 billion in 2023, with expectations to grow at a **CAGR of 12.8% from 2024 to 2030**.

Samsung Galaxy Ring

- Introduced in July 2024, it has garnered significant attention in the wearable technology market. Initially, Samsung planned to produce 400,000 units, but due to higher-than-expected demand, production was increased by 600,000 units, totaling over a million units by the end of the year, totalling 1 Million units.
- Sales Volume Share:** Samsung's 1 million units represent about 28.6% of the estimated 3.5 million units sold globally in 2024.
- Revenue Share:** Assuming a price point of \$399 per unit, Samsung's revenue from the Galaxy Ring would be approximately \$399 million

Oura Ring

- Annual Revenue:** In 2023, Oura reported annual revenue of \$250 million.
- Sales Volume Share:** Oura's 2.5 million units represent about 71.4% of the estimated 3.5 million units sold globally in 2024.
- Revenue Share:** With \$250 million in revenue, Oura accounts for approximately 83.3% of the estimated \$300 million total revenue (2023).

GLOBAL RING SALES DISTRIBUTION(2023)

SAMSUNG VS OURA SALES VOLUME SHARE (2024)

Competitor Analysis

We have highlighted the key features of **direct competitors** to provide a comprehensive final overview of their performance. This analysis ensures a **clear understanding of the competitive landscape** and offers valuable insights to support strategic decision-making.

FEATURES:	Samsung Galaxy Ring 	Oura Ring 4 	Ultrahuman Ring Air 	RingConn Gen 2 	Amazfit Hello Ring

Market Segmentation

The objective of market segmentation is to divide a broad target market into smaller, more manageable **groups of consumers with similar characteristics, needs, or behaviors**. This is crucial to effectively address specific preferences of each segment.

We have decided to focus on Giovanni, among the various possible personas we have identified.

SEGMENTATION TYPE	SEGMENTATION CRITERIA	TARGET CUSTOMER SEGMENT
 GEOGRAPHIC	REGION	ITALY
	DENSITY	BIG CITIES
	AGE	39 OR OLDER
 DEMOGRAPHIC	GENDER	MALE & FEMALE
	LIFE-CYCLE STAGE	MARRIED
	OCCUPATION	REMOTE WORK-CONSULTANCY
 BEHAVIORAL AND PSYCHOGRAPHIC	DEGREE OF LOYALTY	ANDROID USERS
	BENEFIT SOUGHT	COMFORT, HEALTH
	LIFESTYLE	HEALTH CAUTIOUS

Giovanni, a 40-year-old **business consultant** in **Milan**, balances a demanding career of client meetings and leadership with his recently married life. Outside work, he's passionate about **sports, outdoor activities**, fine dining, and exploring new restaurants. **Tech-savvy** and **style-conscious**, Giovanni seeks actionable tools to monitor his health and fitness, enhancing his well-being amidst his dynamic lifestyle.

Daniela, a 39-year-old **marketing director** in **Rome**, leads creative campaigns while managing a dynamic team. She loves exploring the city's rich culture, capturing moments through photography, and unwinding at weekend yoga retreats. Daniela, a **mother of two**, is busy with her professional and familial life, is striving to maintain a **healthy work-life** balance. Trend-conscious, she seeks innovative ways to monitor her wellness to free time for leisure activities with her family.

Marco, a 47-year-old **software engineer** in Bologna, excels in developing innovative tech solutions while mentoring aspiring developers. Outside work, he has a **history of health issues ranging from sleeping disorders and indications of heart problems**. A father of two, Marco treasures family moments and seeks tools to enhance his fitness and well-being, complementing his tech-focused lifestyle.

GIOVANNI
SIMONETTI

- **Age:** 40
- **Gender:** Male
- **Status:** married
- **Location:** Milan
- **Occupation:** Business Consultant
- **Hobbies:** Health and Sports, Tech and Digital engagement, Culinary experiences, Fashion

"I'm looking for functional and elegant gadgets that can help me keep track of my fitness activity and improve my health while juggling my packed work schedule and social lifestyle!"

DESCRIPTION

Giovanni is a 40-year-old manager at a business consultancy firm in the vibrant Milan. He lives a **fast-paced work life**, dealing with long hours of client meetings and leadership responsibilities on a daily basis. Recently married, he is trying to find balance between his thriving career and spending quality time with his partner.

When not working, Giovanni is a **sports addict** and engages in outdoor activities, such as running and hiking. On the weekends, he also enjoys some fine dining, brewery tasting and exploring new restaurants with his spouse.

Giovanni is always **updated with new technologies**, appreciates **sophistication and style**, and is looking for more actionable insights to keep track of his health and fitness performance to enhance his well-being and health while complementing his demanding yet rewarding lifestyle.

TECH-SAVVY

GOALS

- Measure and keep track of fitness performance and have access to deeper insights (sleep patterns, body composition...).
- Improve overall health, productivity and lifestyle choices.
- Stay ahead of fashion and technological trends.
- Seamless integration of health tracking into daily life without compromising style.

FRUSTRATIONS

- Struggling to find time for exercise or meal planning in his packed schedule
- Guilt over unhealthy habits on the weekends
- Lack of seamless, integrated tools to support his health and efficiency
- Current wearables are bulky or annoying during activities like weightlifting or sleep.

- Design
- Performance

- Brand Relevance
- Ease of use
- Durability

Customer Journey

We have mapped the **as-is customer journey**, based on the current interaction steps between the customer and the product. With our campaign, we aim to **redefine a new customer journey**, focused on delivering the key messages we want to convey to the customer at each step.

AWARENESS

Potential customers **discover the existence** of the product. Galaxy Ring addresses the **need to monitor physical health** in a non-invasive and effortless way. Additionally, it meets the **social need** to stay up-to-date with cutting-edge advancements in technology with a high-end practical solution.

INTEREST

Potential customers **compare substitute products** (direct competitors like other smart rings) **and near-substitutes** (like smartwatches or other health-monitoring devices with different functionalities). To capture their interest, it is essential to **emphasize the unique strengths of smart rings**: their elegant, minimalist design and the convenience of 24/7 wearability, especially during sleep, for comprehensive health tracking.

DESIRE

Potential customers **acknowledge the exceptional value of the Galaxy Smart Ring** and its potential as an innovative technology. In particular, those who appreciate staying informed and ahead of the curve are drawn to this product, fostering a **stronger desire to own it** as they view it as both a cutting-edge tool and a statement of being in tune with emerging trends.

ACTION

Customers **finalize their purchase** choosing the colour of the ring and the size, aided by a **sizing kit** that helps them select the right ring size. The kit, available for free online or in-store, comes with **video instructions** to ensure proper use. For online purchases, customers enjoy **zero-interest financing** (with payments deferred to a later date) and **free shipping**. **Expert assistance** is also available throughout the process, ensuring a smooth and confident buying experience.

RETENTION

Since the Samsung Galaxy Smart Ring is newly launched, it is too early to fully assess customer loyalty. However, the **brand's reputation** for quality and innovation plays a crucial role in customer retention. Samsung's **established trust with consumers**, along with **strong post-purchase support** such as **expert consultations** and **accessible customer service**, helps build a foundation for future loyalty. These elements, combined with the product's **seamless integration into the Samsung ecosystem**, set the stage for **ongoing customer satisfaction**.

TOUCHPOINTS

Samsung built anticipation by **releasing teasers** before the product's official launch, sparking excitement and conversation among tech enthusiasts. Moreover, **social media platforms** (like Instagram, YouTube and Twitter) have been used to share promotional content. Finally, the product has been presented both on **physical and online stores**. In this phase, also **word of mouth** is essential.

The Key touchpoints are **website, customer support** (both online and in-store), providing detailed product information and personalized assistance to ensure a secure and informed purchase process, and **social media feedback**.

The touchpoints related to this phase are the **website page** and the **social media platforms**, in which people share their opinion, consenting to customer to create a defined idea about the product.

The touchpoints used for this phase are the **physical and online stores** and a variety of **authorized electronics retailers**.

The touchpoints used for this stage are **client service** (online and offline) and **retention emails**.

Goal Setting and Process

The **growing interest in mental and physical well-being** highlights the need for innovative solutions.

Technology and AI, increasingly integrated into daily life, offer tools to improve lifestyle.

Samsung, known for reliability and innovation, can leverage its strong sense of community to enhance user engagement.

With the Galaxy Ring, users can connect via Bluetooth to the **Galaxy Wearable app**, monitor the device's status, and analyze comprehensive health data. Features include sleep analysis (heart rate, oxygen levels, skin temperature), stress tracking, physical activity monitoring, and menstrual cycle prediction. The app provides an "Energy Score," guiding users toward a balanced lifestyle.

Our goal is to **build upon existing functionalities**, introducing **social and entertaining elements to strengthen Samsung's brand perception**. The campaign transcends sales, focusing on **refreshing the customer's view of Samsung as a lifestyle-enhancing tech leader**. With the **Galaxy app ecosystem**, the initiative connects all Galaxy accessories, reinforcing Samsung's community-driven impact.

Content Ideation and Campaign Theme

BUILD A HEALTHY COMMUNITY WITH SAMSUNG: EMPOWER A SMARTER LIFESTYLE

In recent years, there has been a growing interest in **health, well-being**, and **personal balance**. We believe this theme is highly relevant especially for a type of audience: **young professionals** with **limited free time** who value **self-care** and prefer to achieve it in an efficient, smart way. This is the audience that we are targeting with our campaign.

Our campaign is centered around the creation of a **healthy community** that inspires customers to **embrace a positive and healthy lifestyle**.

Owning a Smart Ring will grant access to this vibrant community through the **Galaxy Wearable app**, which is already employed by Samsung users to **track health data** using the ring's advanced sensors.

The key focus of our campaign lies in **unlocking the full potential of this app**, transforming it into an **interactive platform**. Customers will be able to participate in **health challenges** tailored to their individual health metrics, connect with others by **sharing stories, compare progress**, and **find daily motivation** to stay on track.

By fostering a **sense of belonging** to a Samsung-created community, this initiative will **strengthen the brand** and enhance how customers perceive it. Samsung will be seen more than ever as a brand that truly understands and **supports their physical and mental well-being**, offering **fun and dynamic solutions** to help them reach their health and wellness goals.

Topics and Message Framing

After the identification of the **theme**, which represents the central idea of our campaign, we deployed it into each step of the customer journey. Here, we present the **topics** that form the basis of the campaign communication, along with the corresponding **messages** we aim to convey to our customers.

AWARENESS:

HEALTH AND WELL-BEING ARE PRIORITIES IN OUR LIVES, AND GALEAXY RING OFFERS FUN AND DYNAMIC WAYS TO STAY ON TOP OF THEM

Adopting a healthy lifestyle is simple and fun for everyone, from fitness enthusiasts to those less passionate about it. It can truly improve our routine and make us feel better. **Join the challenge with Galaxy Ring!**

INTEREST:

GALAXY RING TURNS DATA INTO A DRIVING FORCE AND A HEALTH COMMUNITY INSPIRES MOTIVATION

Galaxy Ring is the right choice to enhance your life style. We want to provide you all the information needed to consider this product as a valuable source. If not enough, let's check outside! Current customers will provide you the proof you need.

DESIRE:

A COMMUNITY IS KEY TO REACHING WELLNESS GOALS, AND THE GALAXY SMART RING WILL MAKE YOU ENGAGE AND SUCCEED

Let's try! Feel already like part of a community, follow influencers, and join our events. Your journey has already begun! What are you waiting for?

ACTION:

BUYING A SMART RING IS AN INVESTMENT IN YOUR HEALTH

Purchasing a Galaxy Ring is easy: you can do it everywhere and whenever you want, and you won't be left alone. Once you're fully part of the community, you'll be able to **inspire others** and **share your successes**.

RETENTION:

WE ARE PART OF SOMETHING MEANINGFUL AND ENDURING

Everything is simple! We'll remind you of your set goals and challenge deadlines. You'll feel connected with other users and enjoy healthy, motivating competition. Plus, you'll stay updated on new fitness content and trends.

Media Selection

Here, we present all the media we have selected to **give shape to our campaign**, dividing them based on customer journey base they aim to improve.

AWARENESS:

- MASS MEDIA (TV)
- SOCIAL MEDIA INFLUENCERS & CONTENT
- SEO
- FITNESS/SPORT EVENTS

The goal is to **boost brand awareness and interest** in the Galaxy Smart Ring by **promoting a healthy lifestyle**. Key strategies include TV ads with athlete sponsorship for **wide reach** and **emotional impact**, social media campaigns with influencers for **engagement**, and sports events like marathons and cycling races to **connect with fitness enthusiasts**. The first Samsung-sponsored marathon will take place in **Lecco**.

INTEREST:

- SOCIAL MEDIA INFLUENCERS & CONTENT
- LONG FORM ARTICLES
- ONLINE ADS (WEBSITE)
- SEO

The goal is to **spark curiosity and desire** for the Galaxy Smart Ring by **showcasing its features and benefits**. Strategies include SEO targeting **health-related keywords**, educational blogs, and social media tutorials and testimonials to **build trust** and position it as the ideal lifestyle enhancement.

DESIRE:

- SOCIAL MEDIA INFLUENCERS & CONTENT
- FITNESS/SPORT EVENTS
- RETAIL STORE/ POP-UPS

The Desire phase aims to create an **emotional connection** with potential customers through influencer events, health challenges on the app, and interactive pop-up stores in 6 cities (2 weeks per city). Social media will **drive urgency**, while the second Samsung-sponsored marathon will be held in **Rome**.

ACTION:

- SAMSUNG HOMEPAGE
- SOCIAL MEDIA SHOPPABLE ADS
- RETAIL STORE/ POP-UPS
- SEO

In the Action phase, the goal is to **drive the customer to purchase**. We use shoppable ads on social media and the Samsung website to **simplify the buying process**, allowing customers to **purchase while browsing**. Clear calls to action like **“Join the challenge”** encourage conversions, and tools like **“visitors also buy”** suggest product bundles.

RETENTION:

- SEO
- IN-APP NOTIFICATIONS & CONTENT

The Loyalty phase focuses on **building long-term relationships** through push notifications, in-app messaging, gamification, and community forums. Leaderboards and ambassador-led fitness chats **foster engagement and social proof**, while educational content **enhances the experience** and **strengthens brand trust**.

Editorial Planning

The campaign will span a period of **24 weeks**. This duration was chosen due to the **product's significance** and its **novelty**. The overlap between the phases is designed to ensure a **smooth transition** from one stage to the next. Additionally, certain parts of the campaign serve **multiple purposes**.

The start of the campaign will be **August**. This would allow the marathons to take place in the autumn season, while the action phase would coincide with the Christmas period.

WEEK 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24

COLOR KEY:

- AWARENESS
- DESIRE
- INTEREST
- ACTION
- RETENTION

Medias with multiple purposes:

- **Social media, influencers & content:** they directly impact the awareness, desire, and interest stages since they have vast reach and provide visibility (awareness), create an emotional connection with the customer (desire) and provide engagement (interest).
- Search Engine Optimization (**SEO**) plays a crucial role in guiding customers through every stage of their journey.
- **Fitness/Sport events** are the 2 marathons in Lecco and in Rome. They have slightly different objectives in the campaign.
- The **pop-up stores and retail stores** not only showcase the product but also allow customers to place orders for purchase

Content Management

The following explains how we plan to manage different types of media and content, starting with Samsung's **owned media**, followed by **paid media**, and finally **earned media**. The goal is to organize and balance the effort dedicated to each phase effectively.

OWNED MEDIA

- COMPANY'S WEBSITE
- POP-UP STORES
- E-MAIL NEWSLETTER
- SOCIAL MEDIA PLATFORMS
- APPLICATION

For this bundle of owned media, the initial efforts will focus of the company's own **social media** platforms during the first two phases. These platforms will serve as the primary channels for posting **visuals and teasers to introduce the product**. Once launched, a series of narratives and stories highlighting the device's functionalities will be shared to attract **interest**. For clients seeking more detailed information, the **company's website** should be prepared with **in-depth content**.

Following this, the campaign will shift towards creating **tangible interactions** between the product and potential customers through **pop-up stores**. These stores will allow visitors to explore how the Galaxy Ring integrates seamlessly with other Samsung products.

The final push will come through **limited-time deals** shared via the **website** and **email newsletters**, encouraging customers to act quickly. After purchasing the product, the **galaxy app** will engage customers further through **challenges, leaderboards, and interactive features**, fostering long-term customer loyalty and product satisfaction.

PAID MEDIA

- TV ADVERTISEMENT
- SOCIAL MEDIA & ONLINE ADS
- LECCO & ROME MARATHONS
- SEARCH ENGINE OPTIMIZATION

To maximize the efficiency of the paid media strategy for this campaign, initial efforts will focus on **television, influencer marketing**, and **events** during the **awareness** phase. The primary goal is to capture the attention of potential users in the fitness community by leveraging up and coming figures in the sports world for TV ads, and influencers to dominate the social media space.

Once attention is secured, efforts will shift to the **interest** phase, focusing on **social media ads** and **search engine optimization**. At this stage, the goal is to present testimonials and highlight the product's features and benefits to spark customer interest.

From this point forward, paid media efforts will primarily concentrate on social media advertising to generate desire and drive action. **Limited-time offers** and **shoppable ads** will play a central role. Additionally, events featuring brand ambassadors sharing their experiences will provide an opportunity to reinforce the product's appeal and authenticity.

Additionally, two **marathons** will be held with **Samsung Ring as the main event sponsor**. The marathons will be held in **Lecco and Rome**. It has been decided to do an extensive use of the Search Engine Optimization since it has the best value for money and was added as a main part of the campaign.

EARNED MEDIA

- WORD-OF-MOUTH
- SOCIAL MEDIA REVIEWS
- BLOGS

To earn media, Samsung should focus on promoting **exceptional product quality** and **innovative features**, particularly during the initial phases when the product is still new and unfamiliar. At this stage, the emphasis should be on encouraging genuine reviews and user-generated content to highlight the smart ring's capabilities. Generating unboxing content with product ambassadors will be crucial for building **excitement** and **visibility**.

This approach should help spark word-of-mouth momentum and positive social media reviews. As the campaign progresses, collaborating with prominent bloggers will become more relevant. These partnerships can produce long-form content that showcases the product's **day-to-day usability** and **long-term benefits**, helping to sustain interest and engagement over time.

Cross Channel Interaction

We outline how users engage with various media to create an **interconnected, seamless, and unified experience across these channels**. Below, we have mapped a logical progression of the user journey through different stages, highlighting both **unidirectional and multidirectional linkages**.

- **Blog Post → Website:** A paid blog post contains links directing readers to the brand's website for more information.
- **Online Advertising → Health App:** A display ad on Google or social media promotes the smartwatch, directing users to download the brand's health app.
- **SEO/SEM → Social Media Account:** Paid search ads appear for relevant keywords, encouraging users to visit the brand's Instagram or Facebook page.
- **Influencer Marketing → Email Marketing:** Influencers drive traffic to sign up for the brand's newsletter, where users can get exclusive updates.

- **Website → Social Media Reviews and Mentions:** Customers share positive experiences with the smartwatch after purchasing it from the website.
- **Health App → Social Media Challenges:** Features like fitness goals tracked on the app inspire users to start challenges and share their achievements on social platforms.
- **Email Marketing → Words of Mouth:** Personalized emails prompt satisfied customers to refer the smartwatch to their friends.
- **Point of Sale Systems → Media Coverage:** Data gathered from in-store purchases highlights consumer trends, which are covered by tech news outlets.

Customer Touchpoints

Categorizing customer touchpoints into **paid, earned, and owned media** allowed us to optimize the structure of our marketing campaign. Each touchpoint aligns with different stages of the **AIDAR model**, highlighting actionable steps to enhance the customer journey.

Customer Touchpoints

Categorizing customer touchpoints into **paid, earned, and owned media** allowed us to optimize the structure of our marketing campaign. Each touchpoint aligns with different stages of the **AIDAR model**, highlighting actionable steps to enhance the customer journey.

Campaign Preview

These images provide a preview of the campaign, showcasing the **Samsung Ring Sponsored Marathon** in Lecco (Lake Como) and the **Pop-up Stores** located in Milan, Rome, and Florence. These visuals were generated using AI, with a focus on the physical aspects of our campaign.

Expected Audience

To estimate the expected audience for our campaign, we began with the total Italian population and made **specific assumptions** to arrive at a reliable result. We built a **marketing funnel**, a tool used to map out the customer journey through various stages until the purchase moment.

The Italian population is approximately **59 million**, and the average age is 40 years. We are considering individuals **over the age of 39** (about **58%** of the population) who are **employed (62.5%)**. These filters help narrow our audience to a relevant segment for our campaign, ensuring we target a demographic aligned with our goals and the product's value proposition.

We find in this way an estimate of the amount of people getting the awareness phase.

$100\% \times 58\% \times 62.5\% \times 59.000.000 = 43,75\% \times 59.000.000 = \mathbf{21.387.500}$

From the population of adults who are employed, we further narrow our focus to **individuals genuinely interested in health and smart devices**. According to the statistics **76%** of this group has such an interest, we arrive at a refined estimate of the number of people engaged in the interest phase of the marketing funnel.

This calculation ensures that our campaign targets a highly relevant audience likely to resonate with the Galaxy Ring's features.

$76\% \times 21.387.500 = \mathbf{16.254.500}$

To transition from the interest phase to the desire phase, we estimate the number of people who genuinely wish to own our product. As a reference, we consider the **percentage of adults already using a smartwatch to track their health**—approximately **20%**. This subset reflects a realistic target group that aligns with the Galaxy Ring's functionality and value proposition.

$16.254.500 \times 20\% = \mathbf{3.250.900}$

To transition from the desire phase to the purchase phase, we estimate that **15% of individuals in the desire phase complete the transaction**. This percentage reflects typical behavior in the tech and wearable markets. Factors like price sensitivity, competition, immediate need, and trust in the product often influence the drop-off. However, this rate also highlights the importance of addressing barriers and enhancing the value proposition to maximize conversion rates.

$3.250.900 \times 15\% = \mathbf{487.635}$

In this way, we have identified our **target audience: 487,635 individuals**. This serves as the foundation for estimating the **expected profit from our campaign**. With this figure, we can calculate key performance indicators such as ROI (Return on Investment) and ROMI (Return on Marketing Investment), allowing us to evaluate the campaign's financial effectiveness and strategic impact.

Marketing Expenditure (Best Case)

To estimate the total cost of our campaign, we considered several components: the **digital campaign**, **television advertisements**, **events organization**, and the **creation of pop-up stores**. We excluded costs related to app enhancements and the development of the community platform, as these are assumed to be internalized and allocated within Samsung’s broader operational budget. This streamlined approach allows us to **focus on the campaign-specific expenditures** while leveraging existing resources for technical improvements. The following tables show the results for the best case scenario, in last part it will be included a summarized version of the worst case for comparative purposes:

DIGITAL CAMPAIGN:

ACTIVITY	IMPRESSIONS	CTR	CLICKS	CPC	COSTS
Social Media and Influencers	20.000.000	4,0%	800.000	€ 0,28	€ 224.000
Long Form Articles	1.000.000	5,0%	50.000	€ 2	€ 100.000
Online Ads (Website)	3.000.000	2,7%	81.000	€ 2	€ 162.000
Search Engine Optimization	Cost per month: € 1000				€ 6.000
Social Media Shoppable ads	3.000.000	2,2%	66.000	€ 1	€ 66.000

TOTAL COST = € 558.000

To estimate the **total cost of the digital campaign**, we began by determining the **number of impressions (views)** for each campaign element. For each element, we assigned a plausible Click-Through Rate (**CTR**) to calculate the expected number of clicks. Based on this, we applied a Cost Per Click (**CPC**) to determine the cost associated with each element. This systematic approach ensures a precise allocation of budget for the digital campaign, allowing us to evaluate its efficiency and impact.

The cost associated with SEO differs from the impression-based calculation. Instead, it is determined by a **fixed monthly fee** charged for maintaining and optimizing the website's search engine rankings.

MASS MEDIA (TV CAMPAIGN):

CATEGORY	DESCRIPTION	COSTS
Media Buying (Ad Placement)	Prime-Time Slots (30s, 5x/day for 1 month)	€ 750.000,00
	Off-Peak Slots (30s, 5x/day for 1 month)	€ 105.000,00
Production Costs	High-End Production (actors, CGI, advanced effects)	€ 150.000,00
Miscellaneous	Monitoring campaign performance	€ 50.000,00

TOTAL COST = € 1.055.000,00

To break down the cost of the TV advertising campaign, we considered major components: the **broadcasting fee to allow the transmission**, the **production cost** for creating the campaign, and **additional miscellaneous expenses** such as licensing, talent fees, and post-production. Each of these factors contributes to the overall expenditure required to effectively air the campaign on television.

Marketing Expenditure (Best Case)

FITNESS EVENTS:

Sponsorship Tier	Description	Costs
Title sponsorship	Includes naming rights (e.g., "Galaxy Milan Marathon")	€ 350.000,00
Promotional Campaigns	Collaborating with the marathon for shared advertising campaigns	€ 30.000,00
Hospitality Packages	Access to VIP areas, client hosting, and participant rewards	€ 12.500,00
Custom Branding	Enhanced branding opportunities (e.g., race bibs, medals, banners)	€ 20.000,00

TOTAL COST PER EVENT = € 412.500,00

TOTAL COST PER CAMPAIGN = € 825.000,00

POP-UPS:

Category	Description	Costs
Rental Costs	Medium retail space (50-100 sqm)	€ 6.250,00
Store Setup & Design	Fixtures, displays, signage, and branding	€ 5.000,00
Staffing	Salaries for 2 staff members for 12 weeks	€ 12.000,00
Operational Expenses	Digital ads, printed materials, influencers, stock, utilities, insurance and permits	€ 750,00
Miscellaneous	Cleaning and security services, permits	€ 750,00

TOTAL PER POP-UP COST PER WEEK = € 13.750,00

TOTAL PER POP-UP COST = € 165.000,00

For the sports events, we are considering the costs associated with organizing **two marathons** as part of our campaign.

For the pop-up stores, we are estimating the costs associated with setting up and maintaining each pop-up for two weeks in the **six major Italian cities**: Milan, Rome, Florence, Turin, Naples, and Bologna.

Marketing Expenditure (Worst Case)

For the worst case, a **less conservative range of prices was used**. This scenario takes into account the **most unfavorable possibility** based on cost and profit data, reflecting the least desirable outcome.

Together with the Best Case, which focuses on more optimistic potential results, it provides a **more balanced and realistic perspective on budgeting**, helping to plan effectively by accounting for both risks and opportunities.

DIGITAL CAMPAIGN:

ACTIVITY	IMPRESSIONS	CTR	CLICKS	CPC	COSTS
Social Media and Influencers	20.000.000	4,0%	800.000	€ 0,84	€ 672.000
Long Form Articles	1.000.000	5,0%	50.000	€ 6	€ 300.000
Online Ads (Website)	3.000.000	2,7%	81.000	€ 6	€ 486.000
Search Engine Optimization	Cost per month: € 1000				€ 6.000
Social Media Shoppable ads	3.000.000	2,2%	66.000	€ 3	€ 198.000

TOTAL COST = € 1.662.000

MASS MEDIA (TV CAMPAIGN):

CATEGORY	DESCRIPTION	COSTS
Media Buying (Ad Placement)	Prime-Time Slots (30s, 5x/day for 1 month)	€ 3.000.000,00
	Off-Peak Slots (30s, 5x/day for 1 month)	€ 420.000,00
Production Costs	High-End Production (actors, CGI, advanced effects)	€ 600.000,00
Miscellaneous	Monitoring campaign performance	€ 200.000,00

TOTAL COST = € 4.220.000,00

Marketing Expenditure (Worst Case)

FITNESS EVENTS:

Sponsorship Tier	Description	Costs
Title sponsorship	Includes naming rights (e.g., "Galaxy Milan Marathon")	€ 1.750.000,00
Promotional Campaigns	Collaborating with the marathon for shared advertising campaigns	€ 150.000,00
Hospitality Packages	Access to VIP areas, client hosting, and participant rewards	€ 62.500,00
Custom Branding	Enhanced branding opportunities (e.g., race bibs, medals, banners)	€ 100.000,00

TOTAL COST PER EVENT =
€ 2.062.500,00

TOTAL COST PER
CAMPAIGN = €
4.125.000,00

POP-UPS:

Category	Description	Costs
Rental Costs	Medium retail space (50–100 sqm)	€ 18.750,00
Store Setup & Design	Fixtures, displays, signage, and branding	€ 15.000,00
Staffing	Salaries for 2 staff members for 12 weeks	€ 36.000,00
Operational Expenses	Digital ads, printed materials, influencers, stock, utilities, insurance and permits	€ 2.250,00
Miscellaneous	Cleaning and security services, permits	€ 2.250,00

TOTAL PER POP-UP COST
PER WEEK = € 74.250,00

TOTAL PER POP-UP COST
= € 891.000,00

Expected Return

We have summarized the data related to costs and profits for the two scenarios and calculated the campaign's expected profit using two key metrics: **ROI** (Return on Investment) and **ROMI** (Return on Marketing Investment). These metrics are fundamental to **evaluate the campaign's financial efficiency and effectiveness** and so to **guide decision-making**. In both scenarios, the calculated profit is positive, which validates the marketing effort.

TOTAL COST FOR THE CAMPAIGN (BEST CASE):

€ 558.000,00

+

€ 1.055.000,00

+

€ 825.000,00

+

€ 297.000,00

=

DIGITAL CAMPAIGNTV CAMPAIGNEVENT CAMPAIGNPOP-UP CAMPAIGN

= € 2.735.000,00 TOTAL MARKETING INVESTMENT

TOTAL COST FOR THE CAMPAIGN (WORST CASE):

€ 1.662.000,00

+

€ 4.220.000,00

+

€ 4.125.000,00

+

€ 891.000,00

=

DIGITAL CAMPAIGNTV CAMPAIGNEVENT CAMPAIGNPOP-UP CAMPAIGN

= € 10.898.000,00 TOTAL MARKETING INVESTMENT

Expected Profit:

Number of purchases	487.635
Cost per Ring	€ 450,00
Revenues	€ 219.435.750
*For watches and newer products, Margin related to production cost is 50%	50%

GROSS PROFIT = 487.635 X € 450,00 X 50% = € 109.717.875,00

ROI, ROMI:

ROI (BEST CASE) = 2.765,44%

ROI (WORST CASE) = 906,77%

ROMI (BEST CASE) = 3.911,62%

ROMI (WORST CASE) = 619,12%

ROI = (Gross Profit - Total Cost for the Campaign) / Total Cost for the Campaign

ROMI = (Gross Profit - Total Marketing Investment) / Total Marketing Investment

Total marketing investments is estimated to be 40% higher than the cost of the campaign. This is to account for indirect marketing costs such as staff salaries, tools, softwares and other company resources.

KPIs

We have selected two types of KPIs that we believe are the most relevant for our campaign. The focus is not on sales but on **building a connection with the audience**.

The selected KPIs aim to measure the **campaign's performance both offline and online**. Given the size of the Samsung brand and the numerous divisions it encompasses, **efficient data management** is crucial.

BRAND BUILDING OBJECTIVES KPIS

KPI	DESCRIPTION	METRIC
Online Advertisement Reach	Number of people reached via online ads	# clicks
Social Network Reach	Number of accounts reached via social networks	# impressions
Average Click-Through Rate	ratio of clicks to views	# clicks / #viewers
Number of Marathon searches	Number of people searching the marathon (ring campaign)	# searches

Brand building objective KPIs aim at measuring how the campaign has **impacted brand building** and **enhanced the positions** that samsung has in customers' mind in relation to health and wellness. They are essential for the creation of an **emotional connection with audience**.

CUSTOMER ENGAGEMENT KPIS

KPI	DESCRIPTION	METRIC
Content Shared	Number of times content is shared by customers	# shares
Average Engagement Rate	Average number of interactions with official channel posts	engegement / total # posts
Social Media Marathon Mentions	Number of Mentions and tags of Samsung Ring during marathons	# mentions / # marathon participants
Pop-up Store Traffic & Purchase	Number of people who visited the pop-ups	#Participants/ #Purchases

Customer engagement KPIs aim at measuring **how actively and meaningfully customers interact** with the campaign content.

They focus on **interactions, views, participations**.

They are crucial for the **creation of a loyal brand community**.

Future Plans

This campaign is certainly a first step in leveraging the Galaxy Ring for brand building. If successful, it could pave the way for **future improvements** and **new introductions**. The following presents some ideas.

CAMPAIGN EXTENSION TO OTHER PRODUCTS WITHIN THE GALAXY ECOSYSTEM:

We may introduce challenges that **integrate data from multiple Galaxy devices**, such as Galaxy Watches and smartphones. Moreover, **cross-promotional campaigns**, highlighting the connectivity and synergy of Galaxy products, may be realized. Such extensions would amplify the campaign's impact while enhancing the overall Galaxy brand experience.

A PARTNERSHIP WITH INFLUENCERS:

Influencers in the health, wellness, and tech sectors can promote the Galaxy Ring by sharing personal experiences, challenges, and success stories. Collaborating with influencers would create buzz, raise awareness, and enhance credibility.

LIVE AND VIRTUAL EVENTS:

These events could include **live fitness classes, wellness webinars, or Q&A sessions** with experts in health and technology. Live training sessions and webinars on wellness and technology can be a great way to **engage users**. To expand this further, hosting events in the **metaverse** could offer an immersive experience, allowing participants to attend fitness classes, health talks, or virtual meetups within a virtual space. This would enhance the sense of community, provide **interactive opportunities**, and showcase how technology, like the Galaxy Ring, integrates into modern lifestyles in new and exciting ways.

Future Plans

This campaign is certainly a first step in leveraging the Galaxy Ring for brand building. If successful, it could pave the way for **future improvements** and **new introductions**. The following presents some ideas.

TESTIMONIALS AND CASE STUDIES:

Sharing **success stories from users** who have achieved their fitness or health goals with the help of these devices can inspire others. Featuring diverse individuals from various backgrounds and experiences will help create a **more personal connection** with the audience and **demonstrate the tangible benefits** of using the technology in everyday life.

PARTNERSHIP WITH GYM EQUIPMENT MANUFACTURERS THAT INCORPORATE AI INTO THEIR MACHINES:

Smart gym tools, coupled with the Ring's data, would offer **personalized training plans**, track progress in real time, and provide feedback for optimized performance. This integration would not only make fitness routines more efficient but also highlight how technology can elevate the fitness experience, creating a **truly connected and smarter gym environment**.

CREATION OF PERSONALIZED DIETS AND HEALTH ADVICE THROUGH AI

By analyzing data from the Ring (such as activity levels, heart rate, and sleep patterns), users could receive **tailored dietary recommendations** and **lifestyle tips**. Integrating AI with the Galaxy ecosystem can enhance these recommendations, making them more relevant to individual needs, fostering healthier habits, and helping users achieve their fitness goals more effectively. This could be done through the Galaxy Wearable app or other integrated platforms.

When offering personalized diets and advice, it is crucial to prioritize user privacy and comply with legal regulations.

Clear user consent and transparency about data usage are essential, alongside implementing robust encryption and privacy policies.
